Florida Equity Report

The Florida Equity Report summarizes significant equity measures in enrollment, gender equity in athletics, and employment. It is produced annually by June 30.

The report responds to Florida Board of Governors' Regulation 2.003. Its first section examines representation by race and sex in undergraduate and graduate enrollment and completion. The second section provides details on intercollegiate athletics participation by sex and a report on equity on 11 measures including competition level, facilities, and travel policies.

The final section focuses on selected employment categories. It charts changes in representation by race and sex after one year and after five years. The University establishes goals for the following year if the report identifies areas for improvement.

The utilization presented in each report above meets specific definitions established for that particular report. EO/AA encourages individuals who seek specific enrollment or employment representation metrics to contact UCF [Institutional Knowledge Management](#).
